## Professional Experience

---

### Director's Investment Group (FDLIC)

June 2023 - Present

#### Development Intern

- Developed and enhanced web applications using Java Spring and PrimeFaces, combined with efficient SQL database design and interactions.
- Orchestrated workflow in Pycharm using Prefect, Pandas, and SQLAlchemy; automated tasks in Jira using REST API and JSON.
- Managed Bitbucket pipelines with YAML serialization and shell scripting; automated regression tests on legacy software with Selenium, Java, and Spring-Boot.
- Collaborated in team environments for Java and SQL projects, and conducted front-end unit testing on VueJS components for design validation.

### Church's Chicken

January 2023 - June 2023

#### Systems Developer (Contracted)

- Designed and implemented IT solutions to streamline operations and enhance customer service, such as a custom order management system to reduce wait times.
- Developed and maintained software systems using .NET, SQL, and Python, ensuring reliable and efficient performance.
- Contributed to improved operational efficiency by 30% and cost savings of approximately \$20,000 annually through automation and system optimizations.

## Education

---

Bachelor's in Computer Science August 2022 - Present

Hardin Simmons University

- Maintained a 3.7 GPA in core curriculum and developed leadership skills participating in community service events.

## Personal Projects

---

### Full Stack Streaming Website

Git: [www.bit.ly/AnimeSiteGo](https://www.bit.ly/AnimeSiteGo)

- MERN-based Anime site hosted on AWS that uses the GoGoAnime API to provide users with a seamless streaming experience and a vast selection of animated content.

### AWS Deployment Automation

Git: [www.bit.ly/DeployAuto](https://www.bit.ly/DeployAuto)

- Scripts for AWS-based deployment, integrating MySQL database and Apache server configurations, certbot certification, IAM DNS adjustments, and daily REST API based content posts.
